Press Release Statement:

At KCHC we exist to provide compassionate and comprehensive primary care to the entire Kodiak community. As part of this commitment we have worked diligently to ensure the uphold the highest standards of safety through a pledge to work continuously at improving the workplace safety culture. What makes KCHC the primary care health center of choice in our community is a promise to our patients that they will be treated as we would our own family and friends utilizing patient center medical home methodologies. This is clear in our vision statement; “Working together to achieve ultimate health and well-being”. To meet this goal for our patients and to ensure a safe working environment for our staff we encourage our employees to speak up for safety. Our organization promotes training, drills, and open conversation that includes all employees and the Board of Directors. At KCHC we recognize that a safety culture does not happen in a vacuum; we are continuously looking for ways to improve upon processes and environment by looking to hear the voices from across the organization.
